21. THE NAMES OF THE DEBENTURE TRUSTEE(S) SHALL BE MENTIONED WITH A STATEMENT TO THE EFFECT THAT DEBENTURE TRUSTEE(S) HAS GIVEN HIS CONSENT TO THE ISSUER FOR HIS APPOINTMENT UNDER REGULATION 4 (4) AND ALSO IN ALL THE SUBSEQUENT PERIODICAL COMMUNICATIONS SENT TO THE HOLDERS OF DEBT SECURITIES.

The Debenture Trustee has given their consent to the Issuer vide their letter dated July 23, 2009 for their name to be used as Trustee for the Debenture holders in relation to the Programme. However, as the Debentures are being issued on a private placement basis, a separate undertaking under Regulation 4 (4) has not been obtained.

22. THE RATING RATIONALE (S) ADOPTED BY THE RATING AGENCIES SHALL BE DISCLOSED

The rationale as set out in CRISIL's rating letter dated August 2009 relating to the Debentures is reproduced below.

Rs.10 Billion Equity-Linked Debentures	AA+r/Negative (Assigned)
Rs.5 Billion Non-Convertible Debentures	AA+/Negative (Reaffirmed)
Rs.21.5 Billion Short-Term Debt Programme (Reduced from Rs.31.5 billion)	P1+ (Reaffirmed)

Rating Driver

- Strong expectation of support from ultimate parent, Standard Chartered PLC (SCPLC; rated 'A/Negative/A-1' by Standard & Poor's [S&P]).

Rating sensitivity factors

- Extent of ownership by, and support from, SCPLC
- Significant changes in S&P's view on SCPLC's credit risk profile

Outlook: Negative

CRISIL believes that Standard Chartered Investments and Loans (India) Ltd (SCILL) will continue to benefit from the support from SCPLC, which will help maintain its overall credit risk profile. The ratings could be downgraded in case of a downward revision in S&P's rating on SCPLC, a change in CRISIL's view on the parent's expected support to SCILL, or a weakening in SCILL's presently comfortable capitalisation. Conversely, the outlook could be revised to 'Stable' in case of a revision in S&P's outlook on SCPLC to 'Stable', or a substantial improvement in SCILL's business activity and earnings profile, resulting in a material improvement in the economic benefit that SCILL can bring to SCPLC.

Rationale

SCILL is a wholly-owned subsidiary of SCB UK, which, in turn, is a 100 per cent subsidiary of Standard Chartered Holdings Ltd (SCHL). SCPLC, which is the ultimate parent, holds 100 per cent stake in SCHL. SCILL was incorporated in 2003, with the objective of leveraging SCB UK's sizeable Indian presence (through the branches of SCB UK) in financial services. It is registered with the Reserve Bank of India (RBI) as a non-deposit-taking NBFC. SCILL has been largely focused on raising wholesale resources and deploying them in corporate assets. However, after RBI's guidelines on NBFCs in December 2006, SCILL's incremental business on the corporate lending side has been affected. For 2008-09 (refers to financial year, April 1 to March 31), SCILL has earned a marginal profit after tax (PAT) of Rs.1 million, as against a PAT of Rs.14 million in the previous year.

The ratings are driven by:

Strong expectation of support from SCPLC

In CRISIL's opinion, the 100 per cent ultimate ownership by SCPLC implies a strong moral obligation on the parent to continue supporting its subsidiary. The ratings on SCILL's debt

instruments also factor in the management, capital, funding, and operational support it receives from SCB UK. SCB UK has complete management control over all of SCILL's operations; both SCILL and branches of SCB UK operate under common policies. SCILL's management personnel are on deputation from SCB UK's Indian banking operations arm (SCB India), while SCILL's board of directors comprises directors from associate companies. SCB UK provides operational support to SCILL in sourcing of business. Operational support also comes in the form of inputs on treasury and credit analyses, legal issues, and risk management systems. SCILL, being a subsidiary of SCB UK, also sources funds leveraging on its parent's favourable relationships with other banks and corporate houses; the company has flexibility to raise funds in the form of working capital lines from SCB India. Ownership by SCB UK helps SCILL remain adequately capitalised: it had a capital adequacy ratio (CAR) of 65.30 per cent and low gearing level of 0.43 times as on March 31, 2009. Given the cautious approach that SCILL is likely to adopt in business growth, capitalisation levels would remain adequate in the medium term.

SCILL continues to face business growth and profitability challenges, thereby weakening the standalone credit profile. However, CRISIL believes that the 100 per cent ownership by SCPLC implies a strong moral obligation on the parent to continue supporting its subsidiary; according to SCPLC, this moral obligation remains undiminished, despite the weakened standalone credit risk profile of SCILL. This premise is centrally factored into the ratings.

II. RISK FACTORS

The risk factors set out below should be read in conjunction with the risk factors set out in page 56 of Part C of this Information Memorandum and other related documents.

A. PRODUCT SPECIFIC RISK FACTORS

1. Introduction

The discussion below is intended to describe various risk factors associated with an investment in the Debentures. No investment should be made in the Debentures until after careful consideration of all those factors which are relevant in relation to the Debentures. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Debentures, but does not represent that the statements below regarding risks of holding the Debentures are exhaustive. Investors should also read the detailed information set out elsewhere in this Information Memorandum and reach their own views prior to making any investment decision.

Investors should also consider carefully the description of the Underlying in the sections "Product Conditions" and "Information relating to the Underlying" and the further information which is available in relation to the Underlying.

This Information Memorandum is not, and does not purport to be, investment advice.

An investment in the Debentures involves risks. These risks may include, among others, equity market, bond market, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Some of these are briefly discussed below. Prospective investors should be experienced with respect to transactions in instruments such as the Debentures and in the Underlying. Prospective investors should understand the risks associated with an investment in the Debentures and should only reach an investment decision after careful consideration, with their legal, tax, accounting and other advisers, of (a) the suitability of an investment in the Debentures in the light of their own particular financial, tax and other circumstances, (b) the information set out in this Information Memorandum and (c) the Underlying.

The Debentures may decline in value and Investors should note that, whatever their investment in the Debentures, the cash amount due at maturity will only be equal to the nominal amount.

An investment in the Debentures should only be made after assessing the direction, timing and magnitude of potential future changes in the value of the Underlying, and/or in the composition or method of calculation of the Underlying, as the return of any such investment will be dependent, *inter alia*, upon such changes. More than one risk factor may have simultaneous effect with regard to the Debentures such that the effect of a particular risk

factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Debentures.

2. Rights under the Debentures

Investors should note that the return (if any) on their investment in the Debentures will depend on the value or average value of the Underlying on the specified valuation day(s) as calculated by the Calculation Agent. If such value is less than the value of the Underlying at or about the time of issuance of the Debentures, investors that have bought the Debentures at the time of issuance and hold them for their entire term will receive a limited return or no return on their investment.

3. Index Methodology

Please refer to the section "VI" under Part B. The Underlying is an Index currently comprising shares of companies listed or traded on the NSE or other exchanges in India. The index sponsor may at any time change its approach to the compilation of the index, the weighting given to any security comprising the index or the frequency of rebalancing and such other event which may have an impact on the level or value of the Index.

B. GENERAL RISK FACTORS RELATING TO THE DEBENTURES

1. No Payments until Settlement

Investors should note that no periodic interest payments or other distributions may be made during the term of the Debenture. A realisation in the secondary market of the Debentures may be the only return potentially available to the investor prior to settlement of the Debentures. However, investors should note the risk factors described under the headings "Market value" and "The Debentures may be Illiquid" below in this regard.

2. Early Redemption for Extraordinary Reasons, Illegality and Force Majeure

If the Issuer determines that, for reasons beyond its control, the performance of its obligations under the Debentures has become illegal, impossible or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Debentures for any reason, the Issuer may at its discretion and without obligation terminate early the Debentures. If the Issuer terminates early the Debentures, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Debenture an amount (the "Early Redemption Amount") determined by the Calculation Agent to be its fair market value notwithstanding the illegality or impracticality less the cost to the Issuer of unwinding any underlying related hedging arrangements. The early redemption amount per Debenture may be less than, or substantially less than, the principal amount of the Debentures originally invested by the investors.

3. Market Disruption Events, Adjustments and Early Redemption of the Debentures

If so indicated in the Conditions at page 41 the Calculation Agent may determine that a market disruption event has occurred or exists at a relevant time. Any such determination

may delay valuation in respect of the Underlying which may have an effect on the value of the Debentures and/or may delay settlement in respect of the Debentures.

In addition, if so indicated in the Conditions, the Calculation Agent may make adjustments to the Conditions to account for relevant adjustments or events in relation to the Underlying including, but not limited to, determining a successor to the Underlying or its issuer or its sponsor, as the case may be. In addition, in certain circumstances, the Issuer may terminate early the Debentures following any such event. In this case, in relation to each Debenture, the Issuer will pay an amount, if any, determined as provided in the Conditions.

Investors should review the Conditions to ascertain whether and how such provisions apply to the Debentures and what constitutes an event or relevant adjustment event.

4. Taxation

Potential purchasers and sellers of the Debentures should be aware that they may be required to pay documentary charges in accordance with the laws and practices of India. Debenture Holders are subject to the provisions of General Information -General Taxation Information on page 40 and 53 Payment and/or delivery of any amount due in respect of the Debentures will be conditional upon the payment of all applicable taxes, duties and/or expenses as provided in the Product Conditions.

Potential Investors who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential Investors should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

5. Subscription Period

The Issuer has the right to close the offering of the Debentures prior to the end of the subscription period in case of adverse market conditions, as determined by the Issuer in its reasonable discretion, including but not limited to increased equity market volatility.

6. Principal Protection at Maturity Only

These Debentures are only principal protected when held to their scheduled maturity. In the event that Debentures are sold prior to maturity or are redeemed prior to maturity due to early redemption, Debenture Holders may receive less than the Face Value of the Debenture.

7. Not direct investment in the underlying index

These Debentures are structured investment products. Buying these Debentures is not the same as a direct investment in the Underlying. The market value of these Debentures may not have a direct relationship with the movements of the Underlying and may be affected by other factors including market interest rate movements, the financial condition of the Issuer and/or its Promoters, the market's view of the credit quality of the Issuer and/or its Promoters and the availability of potential buyers in the market.

C. MARKET FACTORS

As used in this section “**Market Factors**”, references to the Underlying shall be deemed to include any of its constituents, if applicable.

1. Valuation of the Underlying

An investment in the Debentures involves risk regarding the value of the Underlying. The value of the Underlying may vary over time and may increase or decrease by reference to a variety of factors which may include corporate actions, macroeconomic factors and/or speculation.

2. The Historical Performance of the Underlying is not an Indication of Future Performance

The historical value (if any) of the Underlying does not indicate the future performance of the Underlying. Changes in the value of the Underlying will affect the trading price of the Debentures, but it is impossible to predict whether the value of the basket constituents will rise or fall.

3. The Basis of Calculating the Level of the Underlying may Change over Time

The basis of calculating the level of the Underlying may from time to time be subject to change (as described in “Information relating to the Underlying”) which may affect the market value of the Debentures at any time and therefore the cash amount payable on settlement.

4. The Value of the Underlying will Affect the Value of the Debentures

The value of the Underlying on any day will affect the value of the Debentures on such day. Changes in the composition of the Underlying and factors (including those described in these Risk Factors) which either affect or may affect the value of the Underlying will affect the value of the Debentures.

5. Interest Rate Risk

An investment in the Debentures may involve interest rate risk in situations where there are fluctuations in the interest rates payable on deposits in the Settlement Currency of the Debentures. This may influence the market value of the Debentures.

Interest rates are determined by factors of supply and demand in the international money markets which are influenced by macroeconomic factors, speculation and central bank and government intervention or other political factors. Fluctuations in short term and/or long term interest rates may affect the value of the Debentures.

6. Market Value

The market value of the Debentures during their term depends primarily on the value and the volatility of the Underlying and the level of interest rates for instruments of comparable maturities.

The level of market volatility is not purely a measurement of the actual volatility, but is largely determined by the prices for instruments which offer investors protection against such market volatility. The prices of these instruments are determined by forces of supply and demand in

the options and derivative markets generally. These forces are, themselves, affected by factors such as actual market volatility, expected volatility, macroeconomic factors and speculation.

Interest rate changes generally have the same impact on the value of the Debentures as for fixed rate bonds: Under normal conditions, rising interest rates will result in a lower value of the Debentures while falling interest rates result in a higher value of the Debentures.

The value of the Underlying on any day will reflect the value of its constituents on such day. Changes in the composition of the Underlying and factors (including those described above) which either affect or may affect the value of the constituents, will affect the value of the Underlying and therefore may affect the return on an investment in the Debentures.

7. Certain Hedging Considerations

Certain risks apply to purchasers that acquire the Debentures for hedging purposes.

Investors intending to purchase the Debentures for the purpose of hedging their exposure to the Underlying or any constituents should recognise the risks of utilising the Debentures in such manner. No assurance is or can be given that the value of the Debentures will correlate with movements in the value of the Underlying or any constituents and the composition of the Underlying or any basket constituents may change over time. Furthermore, it may not be possible to liquidate the Debentures at a price which directly reflects the value of the Underlying or any constituents. Therefore, there can be no assurance as to the level of any correlation between the return on an investment in the Debentures and the return on a direct investment in the Underlying or any constituents.

Hedging transactions in order to limit the risks associated with the Debentures might not be successful.

8. The Debentures may be Illiquid

It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. If so specified in this Information Memorandum, application has been made to list or quote or admit to trading the Debentures on the stock exchange(s) or quotation system(s) specified. If the Debentures are so listed or quoted or admitted to trading, no assurance is given that any such listing or quotation or admission to trading will be maintained. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity than if they were not so listed or quoted or admitted to trading.

The Issuer may, but is not obliged to, at any time purchase Debentures at any price in the open market or by tender or private agreement. Any Debentures so purchased may be resold or surrendered for cancellation. Since the Issuer may be the only party purchasing the Debentures, the secondary market may be limited. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

9. Creditworthiness of the Issuer

The value of the Debentures is expected to be affected, in part, by Investors' general appraisal of the Issuer's creditworthiness. Any reduction in the creditworthiness of the Issuer could result in a reduction in the value of the Debentures. If a bankruptcy proceeding is commenced in respect to the Issuer, the return to a Debenture Holder may be limited and any recovery will likely be substantially delayed.

D. CONFLICTS OF INTEREST

1. Transactions Involving the Underlying

The Issuer and its affiliates may from time to time engage in transactions involving the Underlying for their proprietary accounts and for accounts under their management. Such transactions may have a positive or negative effect on the value of the Underlying and consequently upon the value of the Debentures. As used in this section "Conflicts of Interest", references to the Underlying shall be deemed to include any of its constituents, if applicable.

2. Acting in other Capacities

The Issuer and its affiliates may from time to time act in other capacities with regard to the Debentures, such as calculation agent, agent and/or index sponsor. Such functions can allow the Issuer to determine the composition of the Underlying or to calculate its value, which could raise conflicts of interest where securities or other assets issued by the Issuer itself or a group company can be chosen to be part of the Underlying, or where the Issuer maintains a business relationship with the issuer of such securities or assets.

3. Issuing of other Derivative Instruments in respect of the Underlying

The Issuer and its affiliates may issue other derivative instruments in respect of the Underlying and the introduction of such competing products into the market place may affect the value of the Debentures.

4. Conducting of Hedging Transactions

The Issuer may use all or some of the proceeds received from the sale of the Debentures to enter into hedging transactions. The Issuer believes that such hedging activity will under normal circumstances not have a material impact on the value of the Debentures. However, it cannot be assured that the Issuer's hedging activities will not affect the value of the Debentures. The value of the Debentures might in particular be affected by the liquidation of all or a portion of the hedging positions (a) at or about the time of the maturity or expiration of the Debentures or (b), if the Debentures provide for a knock-out, knock-in or a similar feature, at the time when the price or value of the Underlying approaches the relevant price or level for the knock-out, knock-in or other feature.

5. Issue Price

The issue price charged for the Debentures can, in addition to loading charges, management or other fees charged, comprise a premium on the original mathematical ("fair") value of the Debentures which is not visible to investors. Such premium is determined by the Issuer in its discretion and can differ from premiums charged by other issuers for comparable securities. *Such premium may be paid as commission by the Issuer to the distributor and the amount paid will be in accordance with the regulatory requirements under the Companies Act, 1956*

6. Market-Making for the Underlying

The affiliates of the Issuer may, in certain cases, act as a market-maker for the Underlying, which might in particular be the case when any of such affiliates has also issued the Underlying. By such market-making, such affiliate will, to a large extent, determine the price of the Underlying, and consequently influence the value of the Debentures itself. The prices quoted by such affiliate in its market-making function will not always correspond to the prices which would have prevailed without such market-making and in a liquid market.

7. Acting as Underwriter or otherwise for the issuer of Underlying

The affiliates of the Issuer may also act as underwriter in connection with future offerings of the Underlying or may act as financial adviser to the issuer of an Underlying or in a commercial banking capacity for the issuer of an Underlying. Such activities could present certain conflicts of interest and may affect the value of the Debentures.

8. Obtaining of Non-public Information

The Issuer and/or its affiliates may acquire non-public information with respect to the Underlying, and neither the Issuer nor any of its affiliates undertakes to disclose any such information to any Debenture Holder. In addition, one or more of the Issuer's affiliates may publish research reports with respect to the Underlying. Such activities could present conflicts of interest and may affect the value of the Debentures.

III. GENERAL INFORMATION

GENERAL TAXATION INFORMATION

Purchasers and/or sellers of Debentures may be required to pay stamp taxes and other charges in accordance with the laws and practices of India in addition to the issue price or purchase price of the Debentures.

Transactions involving the Debentures (including purchases, transfers, exercise or non-exercise or redemption, the accrual or receipt of any interest payable on the Debentures and the death of a holder of any Debentures) may have tax consequences for holders and potential purchasers which may depend, amongst other things, upon the tax status of the holder or potential purchaser and may relate to – amongst other taxes and duties – stamp duty, stamp duty reserve tax, income tax, corporation tax, trade tax, capital gains tax, withholding tax, service tax, commodity transaction tax, security transaction tax and inheritance tax.

In relation to each Debenture the relevant Debenture Holder shall pay all Debenture Holder Expenses as provided in the Product Conditions. All payments or, as the case may be, deliveries in respect of the Debentures will be subject in all cases to all applicable fiscal and other laws and regulations (including, where applicable, laws requiring the deduction or withholding for, or on account of, any tax, duty or other charge whatsoever). The Issuer shall not be liable for or otherwise obliged to pay, and the relevant Debenture Holder shall be liable for and/or pay, any tax, duty, charge, withholding or other payment whatsoever which may arise as a result of, or in connection with, the ownership, any transfer, any payment and/or any delivery in respect of the Debentures held by such Debenture Holder. The Issuer shall have the right, but shall not be obliged, to withhold or deduct from any amount payable or, as

the case may be, any delivery due to the Debenture Holder such amount or portion as shall be necessary to account for or to pay any such tax, duty, charge, withholding or other payment. Each Debenture Holder shall indemnify the Issuer against any loss, cost or other liability whatsoever sustained or incurred by the Issuer in respect of any such tax, duty, charge, withholding or other payment as referred to above in respect of the Debentures of such holder.

Tax applicable on coupon/discount, if any, will be deducted at source on accrual thereof in Issuer's books and/or on payment thereof, in accordance with the provisions of Income Tax Act, 1961 and/or under any other statutory modification, enactment, notification, as the case may be. Tax Deduction Certificate will be issued for the amount of tax so deducted.

Potential Investors should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

Potential purchasers of Debentures are advised to consult their own tax advisors as to the tax consequences of transactions involving the Debentures.

If the Debentures are so cancelled, the Issuer will pay an amount to each Debenture Holder in respect of each Debenture held by such Debenture Holder which amount shall be the fair market value of a Debenture taking into account the Index Modification, Index Cancellation or Index Disruption, as the case may be, less the direct or indirect cost to the Issuer and/or any of its Affiliates of unwinding any underlying related hedging arrangements, all as determined by the Calculation Agent in its reasonable discretion. Payment will be made in such manner as shall be notified to the Debenture Holders in accordance with General Condition 4.

3.3.3 The Calculation Agent shall, as soon as practicable after receipt of any written request to do so, advise a Debenture Holder of any determination made by it pursuant to this Product Condition 3 which occurs on or before the date of receipt of such request. 3.4.1.1 require the Calculation Agent to determine the appropriate adjustment, if any, to be made to any one or more of the Conditions to account for the Additional Disruption Event and determine the effective date of that adjustment. Without limitation, such adjustment may take into account and pass on to the Debenture Holder(s) any increased direct or indirect cost to the Issuer and or/any of its Affiliates as a result of or in connection with the relevant Additional Disruption Event; or

3.4.2.2 the Issuer determines that it and/or any of its Affiliates and/or any Hedging Party is unable, after using commercially reasonable efforts, to (A) acquire, establish, re-establish, substitute, maintain, unwind or dispose of any arrangement(s), transaction(s) or asset(s) it deems necessary to hedge the risks of the Issuer entering into and performing its obligations with respect to the Debentures, or (B) realise, recover or remit the proceeds of any such arrangement(s), transaction(s) or asset(s); or

Each Debenture Holder shall indemnify the Issuer against any loss, cost or other liability whatsoever sustained or incurred by the Issuer in respect of any such tax, duty, charge, withholding or other payment as referred to above in respect of the Debentures of such holder.

PART C

OTHER GENERAL INFORMATION

THE PROMOTERS

The company is a 100% subsidiary of Standard Chartered Bank UK.

RISK FACTORS

In addition to the risk factors relating to the Debentures as set out in Part B of this Information Memorandum, the following are the risks relating to the Issuer and the market in general envisaged by the management of the Issuer. Potential investors should consider carefully all the risk factors in this Information Memorandum for evaluating the Issuer and its business and the Debentures before making any investment decision relating to the Debentures. Unless the context requires otherwise, the risk factors described below apply to the Issuer only. If any one of the following stated risks actually occurs, the Issuer's business, financial conditions and results of operations could suffer and, therefore, the value of the Issuer's Debentures could decline.

Unless specified or quantified in the relevant risk factors, the Issuer is not in a position to quantify the financial or other implications of any risk mentioned herein below:

A. INTERNAL RISK FACTORS

1. As an NBFC, one of the most important risks affecting our profitability is the risk of non-payment by the borrowers and other counterparties.

Our Company's loan asset size as of April 8, 2010 was Rs.3.95 billion, the size of our Company's loan assets is expected to continue to increase in the future as our Company expands its business in India and offers new products.

Our Company is exposed to the risk that third parties which owe us money, securities or other assets may not perform their obligations. These parties may default on their obligations to us due to various reasons including bankruptcy, lack of liquidity, operational failure, and other reasons. Further any delay in enforcing the collateral due to delays in enforcement proceedings before Indian courts or otherwise could expose our Company to potential losses.

A nationwide credit bureau has only recently been established in India. This may affect the quality of information available to our Company about the credit history of our Company's new borrowers. In deciding whether to extend credit to or enter into transactions with customers and counter parties, our Company relies largely on information furnished by or on behalf of its customers, including financial information, based on which the Company performs its credit assessment. The Company may also depend on certain representations and undertakings as to the accuracy, correctness and completeness of information, and the verification of the same by agencies to whom such functions are outsourced. Any such information if materially misleading may increase the risk of default. Our financial condition and results of operations could be negatively affected by relying on information that may not be true or may be materially misleading.

Although our Company regularly reviews credit exposures to clients and counterparties and to industries and geographical regions that our Company believes may present credit concerns, defaults may arise from events or circumstances that are difficult to detect or foresee.

2. The Company may be exposed to the potential loss of less recovery of value of collaterals due to delays in their enforcement on defaults by the Company's borrowers and also due to market conditions

Out of the Company's total loan portfolio of Rs.3.95 billion for period ended April,8,2010, 38% of the corporate and retail loan portfolio is secured by collaterals. The value of collaterals especially if the same is real estate, may decline due to adverse market conditions. Delays in bankruptcy and foreclosure proceedings, defects in title, documentation of collateral and the necessity of obtaining regulatory approvals for the enforcement of such collaterals may affect the valuation of the collateral and the Company may not be able to recover the estimated value of the collateral, thus exposing the Company to potential losses.

3. No guarantee and no cross default

Standard Chartered Bank UK has not provided any guarantee in any manner with respect to the Debentures, including Debentures and no Investor shall have any recourse against Standard Chartered Bank UK or any other company in the Standard Chartered Bank Group, except the Issuer, with respect to the performance of the terms and conditions of the issue of any of Series issued pursuant to the Programme.

All Series shall share, on a pari passu basis, the same Security created by the Issuer for all Debentures issued under the Programme. However, there will not be any cross default between different Series or between Debentures issued under the Programme and other indebtedness of the Issuer.

4. We may not be able to attract or retain talented professionals required for our business

The complexity of our business operations requires highly skilled and experienced manpower. Further the successful implementation of our growth plans would largely depend on the availability of such skilled manpower and our ability to attract such qualified manpower. We may lose many business opportunities and our business would suffer if such required manpower is not available on time. Though we have our appropriate human resource policies in place, we may face the risk of losing our key management personnel due to reasons beyond our control and we may not be able to replace them in a satisfactory and timely manner which may adversely affect our business and our future financial performance.

5. The Company faces increasing competition from other established banks and NBFCs.

The successful implementation of our growth plans depends on our ability to face the competition. The Company's main competitors are established commercial banks and NBFCs. Over the past few years, financial services area has seen the entry of banks, both nationalized as well as foreign. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low cost deposits, a factor which can render them less competitive. In the event we are unable to manage our growth effectively, our business and results of operations may be adversely affected.

6. No events of default or other acceleration events

There will be no events of default or other acceleration events applicable to any Series issued under the Programme. In the event that the Issuer fails to make any payment of any amount due under any particular Series, and such default continues for a period of 30 days, then the Debenture Trustee may at its discretion or, in certain circumstances (as more fully set out in the Debenture Trust Deed), shall enforce the Security but only to the extent required to satisfy payment of such defaulted amount.

7. Decisions may be made on behalf of all Debenture Holders that may be adverse to the interest of individual Debenture Holders

The terms of the Debentures contain provisions for calling meetings of Debenture Holders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Debenture Holders including Debenture Holders who did not attend and vote at the relevant meeting and Debenture Holders who voted in a manner contrary to the majority.

8. Downgrading in credit rating

The Programme has been rated by CRISIL as having a AA+r/Negative rating for the issuance of Debentures for an aggregate amount of INR. 10,000,000,000 (Rupees 10 billion only).

The Issuer cannot guarantee that this rating will not be downgraded. Such a downgrade in the credit rating may lower the value of the Debentures and may also result in the Issuer having to withdraw the Programme.

9. Debenture Redemption Reserve

Section 117C of the Companies Act states that any company that intends to issue debentures must create a debenture redemption reserve to which adequate amounts shall be credited out of the profits of the company until the redemption of the debentures. However, the Ministry of Company Affairs has, through its circular no. 9/2002 No.6/3/20001-CL.V dated April 18, 2002, clarified that NBFCs are exempt from this requirement in respect of privately placed debentures. Pursuant to this exemption, the Issuer does not intend to create any reserve funds for the redemption of the Debentures issued under the Programme.

10. Credit Risk

Any lending and investment activity by the Issuer is exposed to credit risk arising from repayment default by borrowers and other counterparties. The Issuer will institutionalise a systematic credit evaluation process monitoring the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluate the changes and developments in sectors in which it has substantial exposure. The Issuer will also undertake a periodic review of its entire asset portfolio with a view to determine the portfolio valuation, identify potential areas of action and devise appropriate strategies thereon. Despite these efforts, there can be no assurance that repayment default will not occur and in such circumstances may have an effect on its results of operations.

11. Interest Rate Risk

The Issuer's business will to an extent depend on factors such as interest income from its operations. The Issuer is exposed to interest rate risk principally as a result of lending to customers at interest rates and in amounts and for periods, which may differ from its funding sources (bank borrowings and permitted debt offerings). The Issuer seeks to match its interest rate positions to minimize interest rate risk. Despite these efforts, there can be no assurance that significant interest rate movements will not have an effect on its results of operations. Interest rates are highly sensitive to many factors beyond the control of the Issuer, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility.

12. Competition from within the Standard Chartered Bank Group

Various members of the Standard Chartered Bank Group in India, such as the branch network of Standard Chartered Bank in India, the asset management business and other such entities engaged in the securities business, compete for the same business and may in certain cases provide similar financial services and products and target the same clientele as the Issuer. The Issuer's results may suffer due to the competition it faces from other members of the Standard Chartered Bank Group

13. Access to Capital Markets and Commercial Borrowings

The Issuer's growth will depend on its continued ability to access funds at competitive rates. With the growth of its business, the Issuer will increasingly rely on funding from the debt capital markets and commercial borrowings. The market for such funds is competitive and its ability to obtain funds at competitive rates will depend on various factors including its ability to maintain its credit ratings. If the Issuer is unable to access funds at an effective cost that is comparable to or lower than its competitors, the Issuer may not be able to offer competitive interest rates for its loans or have adequate funds for its investment activities. This may adversely impact its business results and its future financial performance. The value of its collateral may decrease or the Issuer may experience delays in enforcing its collateral when its customers default on their obligations, which may result in failure to recover the expected value of collateral and adversely affect its financial performance.

14. Potential Conflicts of Interest

The Issuer may appoint an affiliate as its calculation agent for the purposes of calculating amounts payable or deliverable to holders under a Series. Under certain circumstances, the agent as an affiliate and its responsibilities as calculation agent for the Debentures could give rise to conflicts of interest. The calculation agent is required to carry out its duties in good faith and using its reasonable judgment. However, because the Issuer and the affiliate may be controlled by the same holding company, potential conflicts of interest could arise. The Issuer also may enter into an arrangement with an affiliate to hedge market risks associated with its obligations under the Debentures. Such an affiliate would expect to make a profit in connection with this arrangement. The Issuer may not seek competitive bids for such arrangements from unaffiliated parties.

15. Operational and System Risk

The Issuer is faced with operational and system risks, which may arise as a result of various factors, viz., improper authorizations, inappropriate documentation, failure in maintenance of proper security policies, frauds, inadequate training and employee errors. Further, there can also be a security risk in terms of handling information technology related products which involves certain risks like data loss, confidentiality, and business continuity and network security.

16. The Issuer relies heavily on its Promoter

The Issuer relies heavily on its Promoter's financial standing and support and should there be any event which affects it in a materially negative way it will have an adverse impact on the business of the Issuer.

B. EXTERNAL RISK FACTORS

1) Uncertain Trading Market

The Issuer intends to list the Debentures on the WDM segment of the NSE. The Issuer cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange(s) and that there would be any market for the Debenture(s).

Further, the Issuer may not be able to issue any further Debentures under the Programme, in case of any disruptions in the securities market.

2) Future legal and regulatory obstructions

Future government policies and changes in laws and regulations in India (including their interpretation and application to the operations of the Issuer) and comments, statements or policy changes by any regulator, including but not limited to the SEBI or the RBI, may adversely affect the Debentures, and restrict the Issuer's ability to do business in its target markets. The timing and content of any new law or regulation is not within the Issuer's control and such new law, regulation, comment, statement or policy change could have an adverse effect on its business, results of operations and financial condition.

Further, the SEBI, the relevant Stock Exchange(s) or other regulatory authorities may require clarifications on this Information Memorandum, which may cause a delay in the issuance of Debentures or may result in the Debentures being materially affected or even rejected.

3) Material changes in regulations to which the Issuer is subject could cause the Issuer's business to suffer

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently NBFCs not accepting public deposits are exempt from most such provisions. In addition, the Issuer is generally subject to changes in Indian law, as well as to changes in regulations and policies and accounting principles. The RBI also requires the Issuer to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including the provisioning for NPAs or capital adequacy requirements could adversely affect the profitability of the Issuer or its future financial performance by requiring a restructuring of its activities, increasing costs or otherwise. The Issuer is classified as a NBFC-ND-SI as defined in applicable the RBI guidelines, which is subject to certain statutory, regulatory, exposure and

prudential norms and this may limit the flexibility of the Issuer's loans, investments and other products.

4) A slowdown in economic growth in India could cause the Issuer's business to suffer

The Issuer's performance and the quality and growth of its assets are necessarily dependent on the health of the overall Indian economy. A slowdown in the Indian economy may adversely affect its business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general down trend in the economy.

5) Political instability or changes in the government could delay further liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact the Issuer's financial results and prospects

Since 1991, successive Indian governments have pursued policies of economic liberalization. The role of the Central and State Governments in the Indian economy as producers, consumers and regulators has remained significant. If there was to be any slowdown in the economic liberalization, or a reversal of steps already taken, it could have an adverse effect on the Issuer's business. Financial difficulties and other problems in certain financial institutions in India could cause the Issuer's business to suffer. The Issuer is exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties, trends and other problems faced by certain Indian financial institutions. The problems faced by such Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create an adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect the Issuer's business, its future financial performance and its shareholders' funds. General elections for the Parliament and other state legislatures will be held at the latest by May, 2009 and may result in a change in the economic and other policies which may have a material adverse effect on the operations, results and performance of the Issuer.

6) Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and the Issuer's business

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, adverse social, economic and political events in India could have a negative impact on the Issuer. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on the Issuer's business.

7) Market Risk (Product Demand)

The Issuer is in the business of the provision of financial services. The overall demand for the Issuer's products is linked to macro economic parameters like GDP growth, capital markets and liquidity. Any adverse movement in these factors will have an adverse impact on the business of the Issuer. The performance may also be affected by political and economic developments and natural disasters like earthquake, flood, drought, etc. These factors may affect the capital markets as well as realisability of the Issuer's assets.

DEBENTURES RATED AA+/r/ Negative BY CRISIL

This rating indicates that the degree of safety with regard to credit risk on timely payment of obligations on the instrument is high. *The 'r' suffix indicates that payments on the rated instrument have significant risks other than credit risk. The terms of the instrument specify that the payments to investors will not be fixed, and could be linked to one or more external variables such as commodity prices, equity indices, or foreign exchange rates. This could result in variability in payments—including possible material loss of principal—because of adverse movement in value of the external variables. The risk of such adverse movement in price / value is not addressed by the rating.* The risks represented by the 'r' symbol for the captioned instrument are the variability of returns and/or loss of principal, if any, on account of market risk arising due to changes in equity prices.
